

Globally threatened Anatidae species

listed in 2004 IUCN Red List

Number of species

Extinct (EX)	6
Threatened	26
CR Critically Endangered	5
EN Endangered	9
VU Vulnerable	12
Near Threatened (NT)	8

2004 IUCN Red List launched on November 2004, revising list of globally threatened fauna and flora since 2003 List. Listed below are Red List species belonging to Anatidae, searched from the on-line database at www.redlist.org.

Change is found in one species from 2003 List: *Anas laysanensis* is listed as [CR] from [VU] in 2003 List, and added is one Near Threatened species *Oxyura australis*.

Globally threatened Anatidae species

from: IUCN 2004. 2004 IUCN Red List of Threatened Species. <www.redlist.org>. Downloaded on 21 December 2004.

Red List Categories and Criteria for all of Anatidae species are applied with its version 3.1 (IUCN 2001). Boldfaced are migratory species in the East Asian Flyway.

Species	Red List	Trend
<i>Dendrocygna arborea</i>	VU B2ab(i,ii,iii,iv,v)	Deteriorating
<i>Oxyura leucocephala</i>	EN A2bcde	Deteriorating
<i>Oxyura australis</i>	NT	Deteriorating
<i>Anser cygnoides</i>	EN A2bcd+3bcd	Deteriorating
<i>Anser erythropus</i>	VU A2bcd+3bcd	Deteriorating
<i>Anser canagicus (Chen canagica)</i>	NT	
<i>Branta sandvicensis</i>	VU D1	Improving
<i>Branta ruficollis</i>	VU B2ab(iii)	Uncertain
<i>Cyanochen cyanopterus</i>	NT	
<i>Neochen jubatus</i>	NT	
<i>Alopochen mauritanicus</i>	EX	
<i>Tadorna cristata</i>	CR D	Uncertain

Species	Red List	Trend
<i>Mascarenachen kervazoi</i>	EX	
<i>Tachyeres leucocephalus</i>	NT	
<i>Cairina scutulata</i>	EN A2cd+3cd; C2a(i)	Deteriorating
<i>Pteronetta hartlaubi</i>	NT	
<i>Hymenolaimus malacorhynchos</i>	EN C2a(i)	Deteriorating
<i>Salvadorina (Anas) waigiuensis</i>	VU C1	Deteriorating
<i>Anas formosa</i>	VU A3c	Deteriorating
<i>Anas bernieri</i>	EN C2a(ii)	Deteriorating
<i>Anas (aucklandica) aucklandica</i>	VU D1	Stable
<i>Anas (aucklandica) chlorotis</i>	EN B1ab(i,ii,iii,iv,v) +2ab(i,ii,iii,iv,v)	Deteriorating
<i>Anas (aucklandica) nesiotis</i>	CR C2a(ii); D	Stable
<i>Anas laysanensis</i>	CR B1ac(iv)	Improving
<i>Anas wyvilliana</i>	EN B1ab(ii,iii,iv,v)	Deteriorating
<i>Anas melleri</i>	EN C2a(ii)	Deteriorating
<i>Anas luzonica</i>	VU A2bcd+3cd; C1	Deteriorating
<i>Anas marecula</i>	EX	
<i>Anas thodori</i>	EX	
<i>Anas specularis</i>	NT	

Species	Red List	Trend
<i>Anas (acuta) eatoni</i>	VU A3e	Deteriorating
<i>Marmaronetta angustirostris</i>	VU A2cd+3cd	Deteriorating
<i>Rhodonessa caryophyllacea</i>	CR D	Uncertain
<i>Aythya nyroca</i>	NT	
<i>Aythya innotata</i>	CR D	Deteriorating
<i>Aythya baeri</i>	VU A2cd+3cd	Deteriorating
<i>Camptorhynchus labradorius</i>	EX	
<i>Mergus octosetaceus</i>	CR C2a(i)	Deteriorating
<i>Mergus squamatus</i>	EN C1	Deteriorating
<i>Mergus australis</i>	EX
